

Errata for Ben Aketil Repowering and Extension Additional Information (AI 2) dated 14 March 2025

It has been identified that a minor error has occurred within some of the visual material submitted as part of the package Landscape and Visual Additional Information submitted on 14 March 2025 (AI 2).

The error occurred in the figures and visualisations which show the consented Ben Sca Extension turbines in the consented baseline. The error resulted in the two consented Ben Sca Extension turbines (T8 and T9) being shown further south than their actual position. The location of the two turbines was correct in the EIA Report dated May 2023 but was inadvertently changed in the AI 2 in error. It has also been identified that there is a very minor error (30m difference) in the location of T5 in the consented Ben Sca layout, which occurs in both the EIA Report and AI 2. The co-ordinates for the turbine locations are provided in Table 1 and a corrected set of visualisations is submitted with this Errata.

Table 1: Amended Ben Sca and Extension turbine coordinates

Consented Ben Sca and Extension Turbines	Incorrect coordinates in AI 2 dated 14 March 2025	Correct coordinates in amended visuals marked revision B and dated April 2025
T5	132769 E, 848659 N	132796 E, 848659 N
T8	133922 E, 847334 N	132262 E, 849473 N
T9	133717 E, 847561 N	132046 E, 849718 N

Due to the localised nature of the error, this does not affect any of the conclusions reached in the cumulative assessment within AI 2. However, some factual corrections to the description text are required. The below table is provided to amend Section 5 of Volume 2a: Additional Information: Updated Landscape and Visual Assessment with amended text is shown in bold.
